Renovation

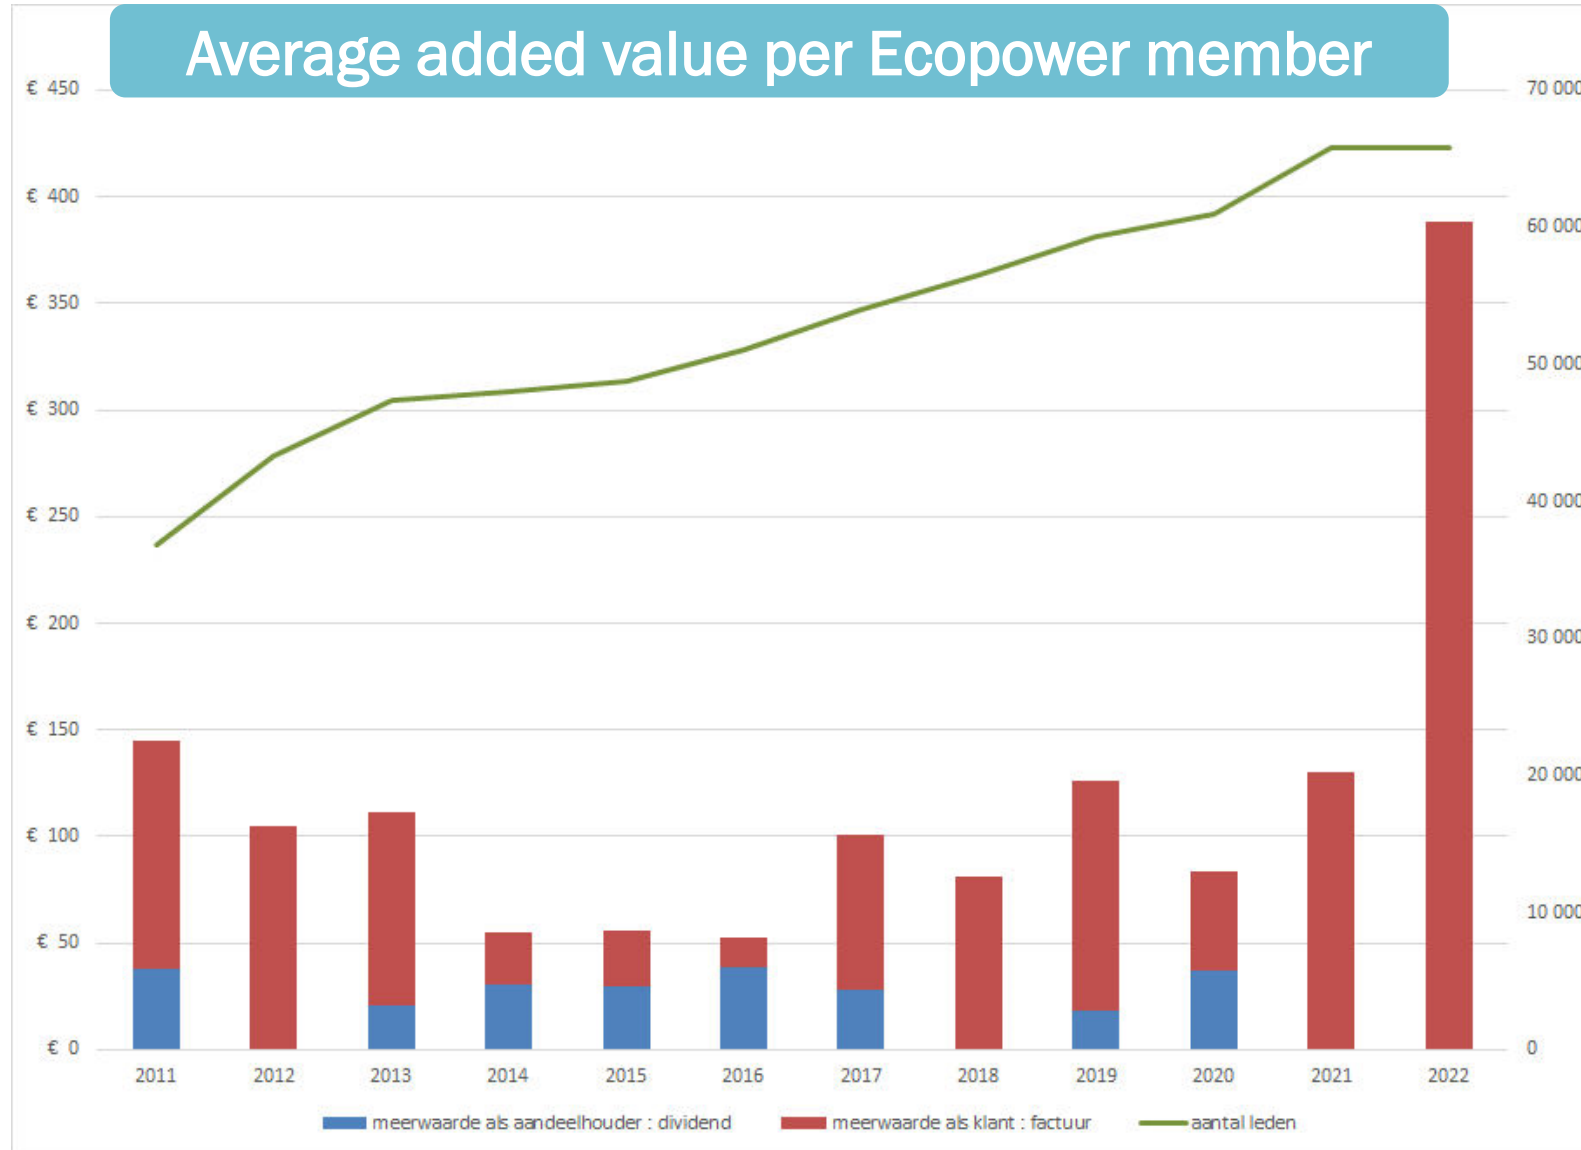

Social just energy transition

Energy monitoring & studies

Added value creation through energy supply

- Dividend added value as shareholder
- Bill added value as customer
- # of members

User > shareholder

Factor 3 on average

1 cooperative windturbine yearly creates +/- 1 Million € added value for wind sharers

Harvest #citizenpower

Energy use at stable tariff

- **Cooperative renewable energy: shareholder and user are the same person, so there is no need to make a profit on the energy supply.**
- **Too few production possibilities, not too little capital**
- **Acceleration of energy transition: consumer confidence provides multiplier effect for acceleration of electrification (heat pumps, EV, renovation,...)**

BE National Energy & Climate Plan. Where we stand

Positive

- (FED) Citizen participation via REC in offshore, to be materialised in tender conditions
- (FL) one DCP Renewable Energy project per 500 inhabitants of a city
- ...

To be worked on

- (FL & W) Mandatory inclusion of REC in wind onshore
- (all) DCP in public procurement
- (FL & W) Open framework for energy communities / energy sharing
- Support for renovation assistance

Mandatory inclusion of REC in wind onshore

Flanders

- Petition 18 (2019-2020) Flemish Parliament
- Renewed via open letter 15/06

The image shows a document titled "DE WIND IS VAN IEDEREEN" (The Wind is for Everyone) from REScoop Vlaanderen. It features a logo for "BURGER ENERGIE" and a photo of a woman with long blonde hair blowing in the wind. The text includes the question "Wat kan ik doen?" and the REScoop Vlaanderen logo. Below the main title, it states: "Burger Energie is de landelijke koepel en belangenvereniging van Burger Energie energiecoöperaties en -verenigingen en andere energie-aanbieders van burgers, beleen en/of lokale bedrijven." The document is dated "Woensdag 15 juni 2022" and is addressed to the Flemish government and parliament. It mentions the "Internationale Dag van de Wind" and the "verzoekschrift 18 (2019-2020)" regarding citizen participation in wind energy development.

Wallonia

Éolien: comment les sociétés privées coupent les ailes des coopératives citoyennes

Quand le prix de l'électricité s'envole, à la plus grande joie de certains... nous, nous éprouvons de la colère.

Une carte blanche de Fabienne Marchal, Présidente de REScoop Wallonie, Fédération wallonne des coopératives citoyennes d'énergie renouvelable.

Il y a parfois de belles histoires qui s'écrivent tout simplement et commencent bien. Laissez-nous vous la conter.

@FLEMAL JEAN-LUC

REC in Offshore Tenderprocedure

		Purpose / goal	Means
Maximalize chance to participate		Make that citizens can certainly participate economically in the Princess Elisabeth area concession.	REC Points “Multigrain”-possibility via Memorandum of Understanding:
Energy use at stable tariff		Accelerating energy transition: consumer confidence provides multiplier effect for accelerating electrification	CooPPA: Cooperative Purchasing Power Agreement, in case of Contract for Difference via Carve out
Minimalize risk for the citizen		Not throw the citizen(cooperatives) into an adventure.	<ul style="list-style-type: none">- Autonomy & ownership- Bank- en build guarantees- Balancing en demand side management
